

TRIMMERS

PERFORMANCE...PERFORMANCE...PERFORMANCE.

What else needs to be said about the world's finest commercial-grade trimmers? Our easy-to-use custom ergonomic controls, light-weight design and super powerful Power Boost Tornado™ technology give you the tools to enhance your productivity. Now you'll spend less time creating a lasting impression and more time enjoying the increased productivity.

Commercial-grade Power Boost Tornado™ engine with Variable Slope Timing (VST) assures fast, easy starts.

Spark-arresting low-tone muffler promotes quiet operation.

Vibration-reducing mounting absorbs engine vibration for greater operator comfort. (SRM models and GT-2400 only.)

See-through fuel tank.

Centrifugal clutch helps prevent the trimmer head from spinning during starting and while the engine is idling.

Cushioned throttle control and grip assembly.

Edging-style left handle.

Heavy-duty cable or steel drive shaft.

Debris shield with built-in cut-off knife assures optimum line length.

Heavy-duty gear case with sealed bearings. (SRM models only.)

WITH EVERY ECHO TRIMMER

SRM-260

CARB SRM-261

State-of-the-art 25.4 cc commercial-duty engine provides outstanding performance in a light, compact package.

- Power Boost Tornado™ technology is strong on power and easy on fuel consumption.
- Hard-chromed cylinder, fully-caged needle bearings and forged connecting rod provide maximum engine durability.
- 59 in. flex shaft is designed to handle the toughest trimming and cutting requirements.
- Extra heavy-duty engine vibration reduction mount and padded handles increase operator comfort.
- Shoulder harness is optional.

Always make sure to adjust the handle to the most comfortable position prior to operating any grass trimmer.

PRO POINTER
